

This is an open call for volunteers to participate in a video made by an film art collective right here in Vancouver. Basically we are looking for both males and females of all ages (over 18), sizes and ethnicities etc. who are willing to bare it all in the name of art. You will be wearing full outfits of bodypainted costumes as the concept of the video revolves around the absurdity of clothing!

The overall appearance of this video (in terms of the bodypainting / set and lighting) will be 1960s pop art/comic book art and the movement will play out in an exaggerated comic book world wherein the cityscape 2 dimension and brightly colored and the inhabitants of this world all happen to be nude with body painted costumes. The costumes will be pre-designed by us for maximum efficiency however we will have many choices and the volunteers can choose which of the designs they prefer to be painted in. Many of the costumes will evoke a 1960s feel.

We will have a crew of talented young filmmakers / artists (many recent graduates of film / art school) working together to create this vibrant bold colored short film that will be edited to music. All the equipment we'll use will be donated to us for the day and we hope to have 3 cameras and many professional lights and accessories along with the backdrop and set. Essentially everyone involved is volunteering and this video is not going to generate profit.

On the day of shooting we will have several volunteer artists available to do the body painting. Once everyone is painted, the filming portion of the day will hopefully be very simple and run smoothly. It requires some very basic movement which I will choreograph as we go along. All you'll need to do is watch me as I demonstrate the movements and then we film you doing them. Easy!

We would LOVE to have you come out if YOU:

- 1- are willing to have your whole body painted
- 2- are willing to be filmed nude with the body paint
- 3- are willing to appear nude with a group of 15-30 other male/females
- 4- can spend one weekend day in early June (exact date TBD)

5- don't mind us screening the video in public at various Film/Video festivals  
AND posting it

on our collective's website (which is currently being developed)

Please RSVP by responding to my email if you are still interested in being involved!
